

# Electrical Contact Pressure Gauge (EP)

## General Description

EP model contact pressure gauges with electrical contacts are suitable for controlling and regulating process sequences. The contact opens and closes electrical circuits in relation to the position of the pointer on the pressure gauge.

Contact pressure gauges with bourdon tube system are used at process pressures of approximately 1 kg/sq.cm and upwards. The materials used to make the gauges are suitable for chemically aggressive gases or liquids, although these may not be too viscous or be susceptible to crystallization.

The tried and tested bourdon tube system coupled with modular contacts, provides a very reliable contact pressure gauge.

Electrical alarm contacts are used as magnetic snap-action contacts, especially in harsh industrial conditions, the high contact pressure and the choice of different electrical contact materials enables high currents to be switched reliably. If the electrical switching capacities of the contacts are exceeded or not reached, a relay is to be used to provide appropriated current rating.

## Features

- Compliance to latest EN837-1
- Nominal sizes: 100 and 150 MM
- Standard ranges: -1 to 0 kg/cm<sup>2</sup> and 0 to 1 up to 700 kg/cm<sup>2</sup>
- Overload capacity 130 % of FSD without contact
- 100% with contact
- Protection to IP65
- Accuracy class  $\pm 1\%$  of FS (contact accuracy 2.5%)
- Stainless steel casing
- Dry or liquid filled version
- External zero adjustment
- Socket to case - TIG argon welded

## Applications

- Chemical and fertilizer
- Petrochemical
- Thermal, nuclear and hydroelectric power stations
- Pharmaceutical
- Food process
- Water treatment plants
- Iron and steel
- Rubber molding/ processing plants
- Hydraulics and pneumatics
- Refineries
- Hydraulic power packs
- Cryogenics

## Specifications

Standards	Description
Reference standard	EN837-1
Mounting	Direct bottom
Connection	½" NPT (M)
Case and bezel	SS304 (Bayonet type bezel)
Bourdon	SS316 L
Socket	SS316 L
Movement	SS304
Dial	Aluminum, white background with black marking
Pointer	Aluminum, black color micrometer with zero adjustable
Accuracy	±1% of FS (standard) (Contact accuracy 2.5%)
	± 0.5% of FS * (Contact accuracy 2.5%)
Dampening liquid	Di electric Silicon Oil up to 100°C *
Over pressure limit	As per EN Standard
	From 0 to 100 Bar, 125% of maximum scale value*
	From 100 bar to 600 Bar, 115% of maximum scale value*
Window	Polycarbonate glass
Protection	IP65 (for all specified sizes)
Blow off disc and filling plug	Neoprene
Gasket	Silicon
Ambient temperature	-25°C to +65°C
Process temperature	Max. 120°C (for dry gauge)
	Max. 100°C (for Di-electric silicon oil filled gauges)

**Note : \*On customer's specific requirement**
