

# Solid Front Pressure Gauge (SF)

The Solid Front (SF) pressure gauge designed for measuring pressure in tough conditions, is built with special consideration to personnel safety, high corrosive resistance and has a long product life. These gauges are suitable for applications in various industries.

These gauges are constructed with a metal barricade interposed between the bourdon tube and window. This ensures that the bourdon tube which is subjected to high process pressures is isolated from the viewing area of the gauge. Coupled with a laminated safety glass and blowout back, these gauges are specially designed to protect operating personnel from any adverse effects of extreme pressure impulses.

The use of corrosion resistant high grade stainless steel, for both the casing and the measurement system, makes these pressure gauge best suitable to operate in an adverse environment and with corrosive media.

The welded design coupled with a modular construction system allows for best-in-class ingress protection (upto IP 65 standard), and also offers a long and stable service life with tried and tested safety features such as vent plug and blowout back adhering to EN 837-1 standard.

## Available In

Nominal sizes	4"(100 mm) & 6"(150 mm)
Ranges	-760 mmHg to 0 & 0 to 0.6 upto 700 kg/sq.cm

## Special Features

- Compliance to latest EN837-1
- Overpressure limit 125 % of FSD
- Ingress protection to IP65
- Accuracy class  $\pm 1.0\%$  of FS
- Stainless steel casing
- External zero adjustment (optional)
- Socket to case - TIG argon welded
- CE marking as per PED 97/23/EC

## Industrial Applications

- Chemical and fertiliser
- Petrochemical
- Thermal, nuclear and hydroelectric power stations
- Pharmaceutical
- Food processing
- Water treatment plants
- Iron and steel
- Rubber moulding / processing plants
- Hydraulics and pneumatics
- Sugar
- Refineries
- Hydraulic power packs
- Cryogenics

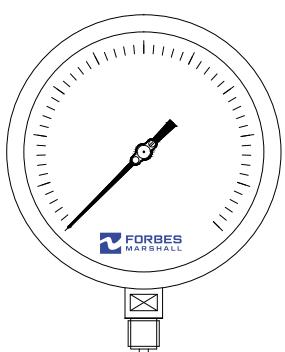

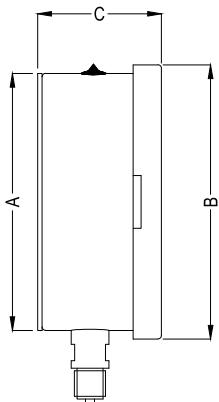

## Standard Product Specifications

Specifications	Description
Reference standard	EN 837 - 1
Mounting	Direct bottom
Connection	½" NPT (M)
Case & Bezel	SS 304
Bourdon	SS 316L
Socket	SS 316L
Movement	SS 304
Dial	Aluminum, white background with black marking
Pointer	Aluminum, black color micrometer with zero adjustable
Accuracy	±1% of FS (standard)
Overpressure limit	As per EN standard
	From 0 to 100 Kg/sq.cm, 125% of maximum scale value
	From 100 to 600 Kg/sq.cm, 115% of maximum scale value
	From 600 to 1600 Kg/sq.cm, 110% of maximum scale value
Window	Safety laminated shatterproof glass
Protection	IP65
Blow off disc	SS 304 – for SS 304 case
	SS 316 – for SS 316 case
Filling plug	Neoprene
Gasket	Silicon
Ambient temperature	-25°C to +65°C
Process temperature	Max. 200°C (for dry gauge)

Technical specifications, MOC subject to change without prior notice

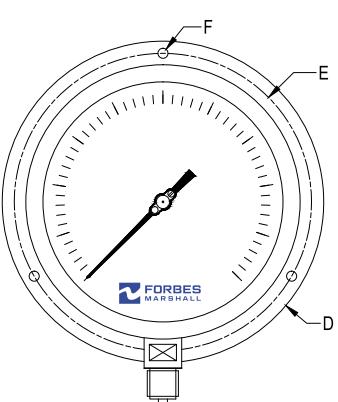

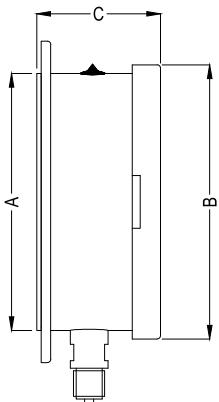

## Mounting Options

### Direct Bottom

→ Parameters	A	B	C
100	Ø100	Ø110	60.0 ± 1.5
150	Ø149	Ø160	63.0 ± 1.5

### Surface Bottom

→ Parameters	A	B	C	D	E	F
100	Ø100	Ø110	60.0 ± 1.5	Ø134	Ø118	Ø6
150	Ø149	Ø160	63.0 ± 1.5	Ø186	Ø168	Ø6
